

## **KRA – Electronics & Service Engineer**

| <b>No.</b> | <b>KRA</b>                                            | <b>Key Responsibilities</b>                                                                                                                   |
|------------|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b>   | <b>PCB Repair &amp; Electronics Troubleshooting</b>   | Diagnose and repair PCBs, controllers, displays, power supplies, sensors and related electronic circuits.                                     |
| <b>2</b>   | <b>Root Cause Analysis</b>                            | Identify root causes of recurring electronic/PCB failures and implement corrective actions.                                                   |
| <b>3</b>   | <b>Cardio Equipment Service &amp; Troubleshooting</b> | Diagnose, service and troubleshoot cardio equipment at site when required, including electrical, electronic, motor, sensor and wiring issues. |
| <b>4</b>   | <b>Client &amp; Technician Support</b>                | Coordinate with clients and technicians, provide technical guidance, resolve complaints and ensure timely closure.                            |
| <b>5</b>   | <b>Spare Parts Requirement</b>                        | Identify required spare parts based on diagnosis and coordinate their requirement for service activities.                                     |
| <b>6</b>   | <b>Documentation &amp; Records</b>                    | Maintain PCB repair, failure analysis, service, and spare-parts records accurately and systematically.                                        |
